Owner: Application

2 occurrences

Summary

Expected \$.discount equals 12, but got 0 (response 200 from GET http://127.0.0.1:63437/api/appointments/8/bill).

Whose issue: application bug. How to fix: If the API is wrong, fix it; if the expectation changed, update the assertion.

Application	CareClinic > Billing
Scenario	Insured patients get 20% off
Environment	Local · http://127.0.0.1:63437
Browser / viewport	chromium 153.0.8010.12 · desktop
Operating system	Darwin 25.5.0
First seen / last seen	7 Oct 2026, 08:47 / 7 Oct 2026, 08:47

Steps to reproduce

1. Run a reusable block – API login
 2. Generate a random date (save as day) – A free date
 3. Send POST /api/appointments (save as appt) – Book Ana Lopez with Dr. Reyes
 4. Send GET /api/appointments/{{vars.appt.id}}/bill – Get the bill ← fails here

Expected

\$.discount equals 12

Actual

0 — Expected \$.discount equals 12, but got 0; Expected \$.total equals 48, but got 60

Diagnosis

Where: step 4 — Get the bill

Why (likely): The response has 0 where the test expects 12
Expected \$.discount equals 12, but got 0 (response 200 from GET http://127.0.0.1:63437/api/appointments/15/bill).

Whose issue: Application (confidence 60%)

How to fix: If the API is wrong, fix it; if the expectation changed, update the assertion.

Check	\$.discount equals 12
Actual	0
Difference	-12

Evidence
